

I've owned XMRadio for 6mos. I travel in my car extensively and find the XMRadio very helpful with road conditions and weather. I enjoy the comercial free music and talk programs. I support XMRadio's ability to provide me this kind of programming . I will not own another vehicle without XMRadio.It should not be up to the National Assiciation of Broadcasters to dictate who we hear on the radio.Thank you for your attention.
